Read me first

The Rack Report™ · Sample Ridge Farm · December 13, 2025

Start here. Everything about the flight over Sample Ridge Farm is in this folder. The files are numbered in the order to open them. You only need the first four; the rest are extras for map apps.

Start here (about 2 minutes)

1. **Open “4 - Interactive map”.** Double-click it and it opens in your web browser (Edge, Chrome or Safari). Click or tap any numbered pin to see its photos. It works without the internet.
2. **Want the pins in onX, Moultrie or Google Earth?** Open “2 - HOW TO OPEN THESE FILES”. It walks you through each app, step by step.

Did this come as a zip file?

A zip file is a folder squeezed into one file so it can be emailed or downloaded. Open it up first:

- **Windows:** right-click the zip file, choose **Extract All…**, then click **Extract**. A normal folder opens. Use that folder, not the zip.
- **Mac:** double-click the zip file. A folder appears next to it.
- **iPhone or Android:** tap the zip file in the Files app to open it. On a phone, the easiest way to see everything is the link we texted you, if you got one.

What’s in this folder

1 - READ ME FIRST	This page.
2 - HOW TO OPEN THESE FILES	Step-by-step help for every file: the PDF, the interactive map, onX, Moultrie, Google Earth, Google Maps, GPS units and Excel.
4 - Interactive map	A map of the property you can click or tap. Each pin shows its photos and details. Opens in any web browser.
5 - Map pictures	The maps as picture files, easy to text, print or set as a phone background.
6 - Google Earth	Every pin with photos inside, for Google Earth on a computer or phone. The file name starts with “Google Earth”.
7 - onX Hunt and Moultrie Mobile (hunting apps)	Each file name starts with the app it's for. **onX - PHONE APP**: open it on your phone in the onX app. **onX - COMPUTER**: import it at webmap.onxmaps.com. **onX - PHOTOS**: the bucks' and predators' photos, named by pin number. **Moultrie Mobile**: import it at moultriemobile.com on a computer.
8 - Garmin GPS, Google My Maps and Excel	Each file name starts with what it's for: **Garmin or other GPS app**, **Google My Maps**, **Excel**, and **Any spreadsheet** (GPS points that open in any program).
zz_map_page_files_do_not_move	Pictures the interactive map uses. Leave it where it is, next to the map file, or the map will show blank photos.

Good to know

- The pin numbers (#1, #2, #3…) are the same in the report, the interactive map, the map pictures, onX, Google Earth and the photo names.
- Nothing here needs to be installed. The PDF opens in your web browser or any PDF app.
- Keep a copy of this folder. Next year’s flight can be compared to this one.
